Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. This action is in response to the papers filed 10/27/1002 for serial number 10/087,595.

Election/Restrictions

2. Claims 1-7 and 12-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the papers filed 06/09/2003. The election requirement is hereby made final.

Claim Objections

3. Claim 10 is objected to because of the following informalities: The word "switch" is spelled incorrectly. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 19 and 20 are indefinite because the recitation, "the switch is manipulated *during normal functioning of the transmission control device is hampered,*" is not clear enough to ascertain what scope the applicant intended to cover. It is unclear whether

this claim covers the switch being manipulated during normal functioning of the transmission control device and when the transmission control device is hampered, or only when the transmission control device is hampered.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

7. Claims 8 and 19 are rejected, as best understood, under 35 U.S.C. 102(b) as being anticipated by Bates ('393).

Bates discloses a parking lock state releasing apparatus (Fig. 1) comprising a parking lock member (any member inside 14 controlling the parking lock), a power transmitting member (70), and a conventional movable member (50), and a switch (280), wherein the power transmitting member is driven in response to operation of the movable member when the movable member is connected to the power transmitting member by the switch (the moveable member is connected to the power transmitting member by the switch when the switch 280 is removed) and the parking lock state of the transmission is changed in accordance with the driving of the power transmitting member.

With respect to claim 19, the switch is manipulated during normal functioning of the transmission control device and when the transmission control device is hampered.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 9-11 and 20 are rejected, as best understood, under 35 U.S.C. 103(a) as being unpatentable over Bates ('393) in view of in view of Gudlin DE 197 42 573 A1.

Bates lacks any specific disclosure of the power transmitting member being a lever. Gudlin discloses a cable device (14) controlled by a push/pull force of a lever Fig. 1 (10). It would have been obvious to one of ordinary skill in the art at the time of this invention to modify the power-transmitting member of Bates such that it is a lever, in view of Gudlin, to control the operation of the power transmission via the mechanical advantage of the push/pull force of a lever.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3681

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M Williams whose telephone number is 703-305-0607. The examiner can normally be reached on Mon. - Fri. from 7:30am - 5:00pm.
